

Letter to Jeffrey Pinsler, S.C., LLB, LLM, LLD

[1] I congratulate you on the astonishingly speedy publication of Singapore Civil Practice 2022 on the Ideal Rules of Court which were announced by the Singapore Ministry of Law under ‘Upcoming New Legislation on Court Procedures for Intellectual Property Disputes’ on 23 February 2022, and which came to effect on April Fool’s Day of 2022.

[2] I had been concerned that, what with the Ideal Rules of Court, your oeuvre would become moot. I am relieved.

[3] While arguing the matter of HC/S 413/2021 (concerning illegal activity *at Nanyang Technological University*) with Singaporean lawyers or Officers of the Supreme Court, I had occasion to disagree on what constitutes ‘unrightful’ vs. ‘unlawful’. I would start to say: ‘Pinsler says...’ and before I had time to complete the sentence the ubiquitous interruption from any and all lawyers was: ‘Pinsler is not a practicing lawyer.’¹

[4] Everyone knows your stand with perjury and Lily Kong. Everyone knows the Act of Parliament passed for your sake. I suppose it was foolish of me to be concerned in the first instance.

[5] I cannot afford SG\$ 1,069.20, nor for that matter SG\$ 853.20, because *OCBC* took all my money with forged *Authentic Court Order(s)* from *Rajah & Tann* and Justice Jaswinder Kaur would not tell me where my prayers for compensation for *the* negligence by *CrimsonLogic* can be answered, if not at *CrimsonLogic*. Do you mind sending me Chapter 2?

Thank you,

Mohamed Helmy

MD, PhD, Plaintiff/Defendant, litigant in non-person

¹ The ones around Chinatown said it with poorly concealed vitriol. The ones around Raffles managed to maintain a relatively flat tone. One lawyer further afield with a very large and nice computer monitor shouted it, and flew into a rage for a good five minutes. (*N.B.* He could not use his very large and nice monitor to confirm that the *Authentic Court Order(s)* issued by *CrimsonLogic/Supreme Court* or Eunice Chan Swee En, Timothy Ang, and Wilson Zhu, were forged. However, this could have been a fault with his very nice and large keyboard. Alternatively, it could have been a problem with his also very large, or at least broad, but not nice at all, fingers).
